

Electric Offers: ComEd Territory

Below is the price per kilowatt-hour you will pay ComEd for electricity. You are allowed to choose another company (also known as an “alternative retail electricity supplier,” or “ARES”) to supply you with electricity. However, you should know it is illegal for ComEd to make a profit off of what it charges you for electricity. Alternative suppliers, on the other hand, can charge whatever they want. *At this time, ComEd is likely your best bet.*

ComEd (Regulated Utility)	Price to Compare Through May 2021: 7.067 cents kilowatt-hour (kWh) (Note: On your bill it's 0.07067)
-------------------------------------	--

Alternative Electric Offers as of November 4, 2020

Beware that offers change frequently, and rates only reflect the price of power itself. The ComEd price includes the Electricity Supply Charge (the price for power) and the Transmission Services Charge. The price does not include the Purchased Electricity Adjustment (PEA). Alternative supplier offers do not have a PEA.

Company	Offer	Term	Green?	Monthly Fees?
AEP Energy	7.45¢ per kWh	12 months, fixed	Yes	No
